ABOUT THE PROJECT

The installation of Closed Circuit Television (CCTV) systems at all GTDC (Goa Tourism Development Corporation) residencies aims to enhance the security and surveillance measures in place.

By implementing CCTV cameras in strategic locations within the residencies, this project aims to deter criminal activities, improve safety for residents and guests, and provide valuable evidence in case of any untoward incidents. The project will cover all GTDC residencies across various locations in Goa, ensuring a comprehensive surveillance network.

Overall, the project's implementation offers numerous benefits to the government, including enhanced security measures, improved public safety, efficient resource allocation, strengthened reputation, cost savings, increased public confidence, and valuable data for decision-making.
